--	--	---	--	--

Test Class 1 Output:

Selection : r

Recording service

Enter Room Id: 101

B: Bar Fridge

R: Restaurant

S: Room Service

Enter service typer

Enter cost: 100

Room 101 charged \$100.00 for Restaurant

Cost added: 100.0

## Debug Log for Test Case 1:

Room : 101, SINGLE  
Room : 201, DOUBLE  
Room : 301, TWIN\_SHARE

Hotel Management System

Please select:

B: Book a Room  
C: Check In  
R: Record Service  
D: Check Out

Q: Quit

Selection : b

Booking Room

Enter phone number: 213123  
Enter guest name: dasda  
Enter guest address: wqewq

Name: dasda, Address: wqewq, Phone: 213123

S: Single room, 1  
D: Double room, 2  
T: Twin share, 3  
Enter room type selection: s  
Enter number of occupants: 1  
Enter arrival date  
Enter day (dd): 12  
Enter month (mm): 12  
Enter year (Y): 2018  
Arrival Date: 12-12-2018  
Enter length of stay: 5

The cost of booking a Single room from 12-12-2018 for 5 nights is \$500.00

Enter credit card details

V: Visa

M: MasterCard

Enter credit card type selection: v

Enter credit card number: 1

Enter CCV: 213

Single room 101 is booked from 12-12-2018 for 5 nights by dasda.

Visa Credit card number 1 has been debited \$500.00

Confirmation Number : 12112018101

Hit <enter> to continue

Booking completed

Hotel Management System

Please select:

B: Book a Room

C: Check In

R: Record Service

D: Check Out

Q: Quit

Selection : c

Checking in

Enter confirmation number: 12112018101

Single room 101 is booked from 12-12-2018 for 1 nights by dasda.

Visa Credit card number: 1

Confirmation Number : 12112018101

Confirm checkin? (Y/N) : y

Check in confirmed

Hit <enter> to continue

Checking in completed

Hotel Management System

Please select:

B: Book a Room

C: Check In

R: Record Service

D: Check Out

Q: Quit

Selection : r

Recording service

Enter Room Id: 101

B: Bar Fridge

R: Restaurant

S: Room Service

Enter service typer

Enter cost: 100

Room 101 charged \$100.00 for Restaurant

Cost added: 100.0

Hit <enter> to continue

Pay for service completed

We can see the service charges charged by customer against a booked room is added to list of services of bookings, the charge is being correctly send to Booking class by serviceDetailsEntered method in class RecordServiceCTL. So the issue must be in Booking class while adding a new ServiceCharge to a Booking.

```
3
6- public void checkIn() {
7     room.checkin();
8 }
9
10
11- public void addServiceCharge(ServiceType serviceType, double cosst) {
12     charges.add(new ServiceCharge(serviceType, cost));
13 }
14
15
16- public void checkOut() {
17     room.checkout(this);
18 }
19
- .
```

The bug is in line no 2 of method addServiceCharge.

## Resolution:

The cost of the new ServiceCharge being added is being assigned as `cost` but it should be `cosst`.

## Output after Resolution:

Hotel Management System

Please select:

B: Book a Room  
C: Check In  
R: Record Service  
D: Check Out

Q: Quit

|  
Selection : d

Checking out

Enter room number: 101

Charges for room: 101, booking: 12112018101

Arrival date: 12-12-2018, Staylength: 1

Guest: dsadsa, Address: hhh, Phone: 132131

Charges:

Restaurant : \$100.00

Total: \$100.00

Accept charges (Y/N) :

Turn 40 and 42 demonstrates the code working accurately since the balance is now increasing with the bet amount won.

<b>Test Name</b>	Test Case 2 – It is possible to charge a room for service after the guest has checked out
<b>Use Case Tested:</b>	checkIn, checkout and addServiceCharge
<b>Test Description:</b>	The following test is conducted to check if the service can still be charged for a room after the guest has checked out.
<b>Pre-conditions</b>	Guest has checked out Add a service Charge
<b>Post-conditions</b>	Service charge should not be added
<b>Notes:</b>	
<b>Result</b>	<b>Fail</b>

(Pass/Fail/Warning/Incomplete)				
15.	16. TEST STEP	EXPECTED TEST RESULTS	P	F
17.	<pre> public void checkIn() {     room.checkin(); }      public void addServiceCharge(ServiceType serviceType, double cosst) {     charges.add(new ServiceCharge(serviceType, cost)); }      public void checkOut() {     room.checkout(this); } </pre>			<b>F</b>

Test Class 2 Output:

Hotel Management System

Please select:

B: Book a Room  
C: Check In  
R: Record Service  
D: Check Out

Q: Quit

Selection : d

Checking out

Enter room number: 101  
Charges for room: 101, booking: 12112018101  
Arrival date: 12-12-2018, Staylength: 1  
Guest: dsadsa, Address: hhh, Phone: 132131  
Charges:  
Restaurant : \$100.00  
Total: \$100.00

Charges accepted

Enter credit card details  
V: Visa  
M: MasterCard  
Enter credit card type selection: v  
Enter credit card number: 1  
Enter CCV: 211  
Visa credit card number 1 was debited \$100.00  
Hit <enter> to continue  
Checking out completed

Hotel Management System

Please select:

B: Book a Room  
C: Check In

R: Record Service  
D: Check Out

Q: Quit

Selection : r

Recording service

Enter Room Id: 101

B: Bar Fridge

R: Restaurant

S: Room Service

Enter service type r

Enter cost: 100

Room 101 charged \$100.00 for Restaurant

Debug Log for Test Case 2:

```
public void checkIn() {  
    room.checkin();  
}
```

```
public void addServiceCharge(ServiceType serviceType, double cost) {  
    charges.add(new ServiceCharge(serviceType, cost));  
}
```

```
public void checkOut() {  
    room.checkout(this);  
}
```

The above methods are the origin of the problem as state of the room is not changed while checking in and checking out and while adding service charge to a booking its status is not verified beforehand.

Resolution for Test Case 2:

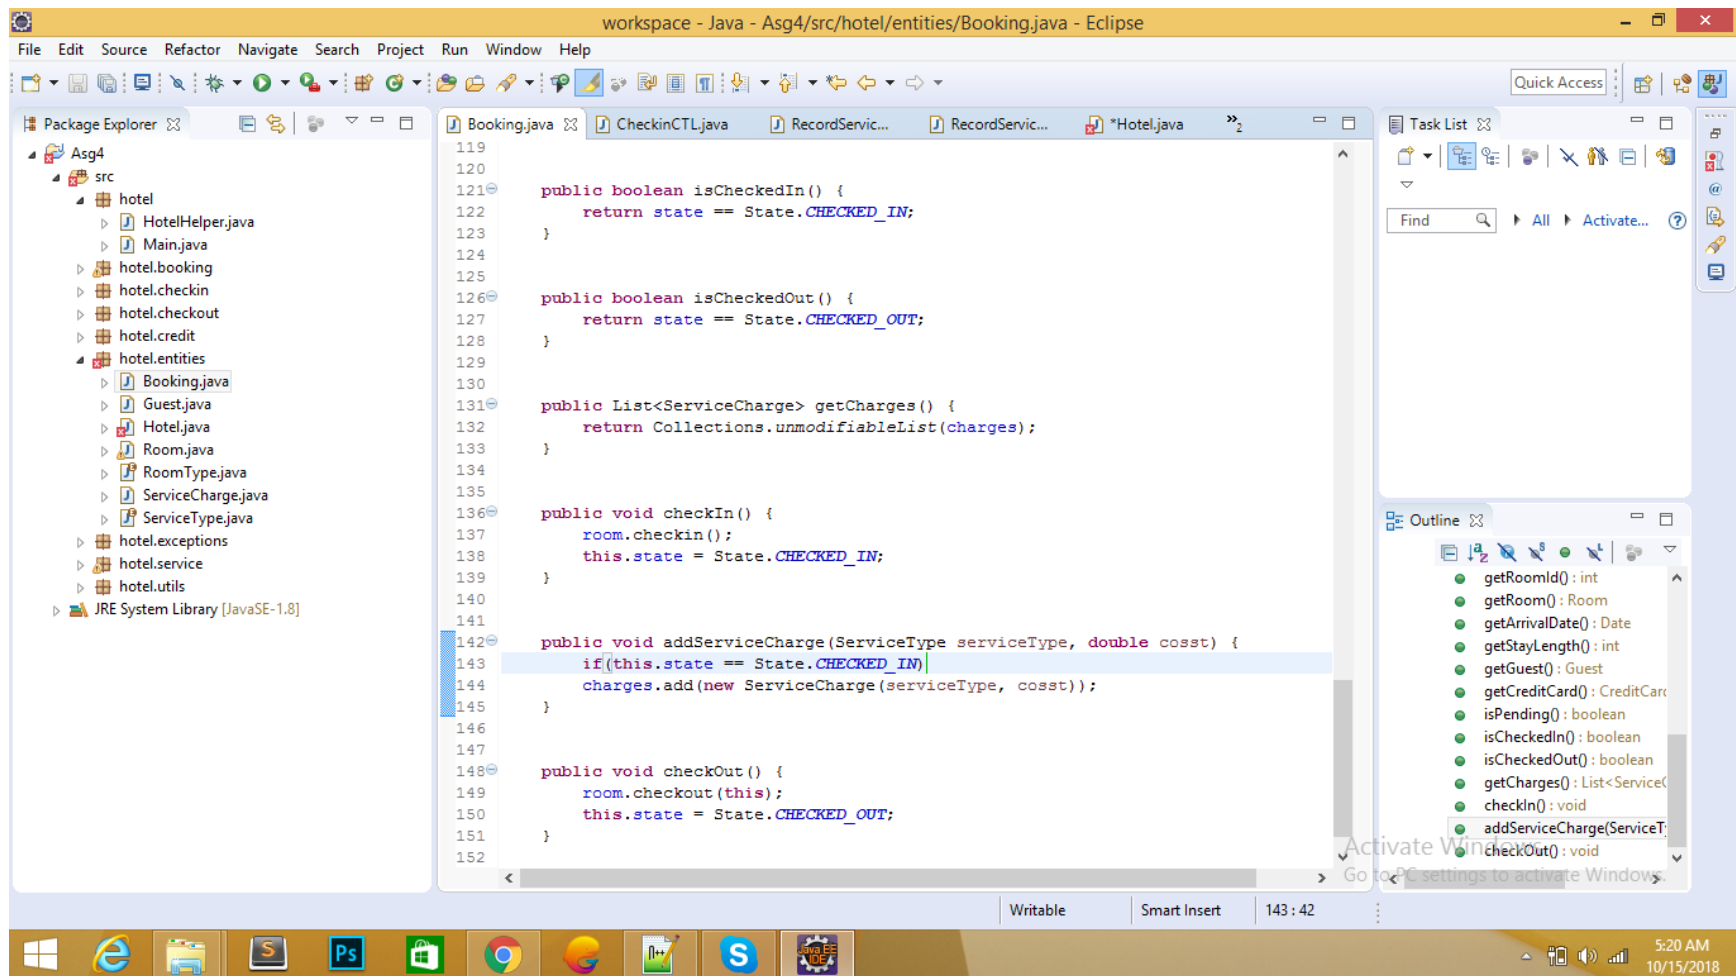

```
public void checkIn() {
    room.checkin();
    this.state = State.CHECKED_IN;
}

public void addServiceCharge(ServiceType serviceType, double cosst)
    if(this.state == State.CHECKED_IN)
        charges.add(new ServiceCharge(serviceType, cosst));
}

public void checkOut() {
    room.checkout(this);
    this.state = State.CHECKED_OUT;
}
```

As long as we change the status of a booking to keep it updated it wont be possible to charge a room for service after the guest has checked out.

While checking in we change it to State.CHECKED\_IN, while checking out we can set the status to CHECKED\_OUT. So we can check whether the status of booking before charging for a service.
